TIMELY TOPICS

LAWS ARE MADE TO BE KEPT
The license authorities of Cayley united with the Provincial authorities in tracking down various law breakers in that city. Police Supt. Cuddy also united his forces with the above and the result was gratifying. There has been flagrant and systematic law breaking in that city, principally by Chinamen who have been selling liquor and opium without a license on week days and Sundays alike. Now we have no particular animosity against Chinamen or against men of any nationality whatever, but as Canadians we do positively object to men coming into this country and thinking that because it is a free land they can ignore its laws and break them just as they please. We may take it for granted that a law is generally passed because it is needed, and we are glad to see that the authorities of the province are emphasizing the fact that laws are made to be observed. Let us all unite in regard to this matter, and add our weight ever to the enforcement of the country's laws, and we shall thus contribute toward making it what we want it to be, a country worth living in.

THAT ELUSIVE CANADIAN NAVY

Another idea has been mentioned in the papers during the past week, not altogether new perhaps, but worthy of sincere consideration. It is this: "Canada should have a navy on non party lines." The idea is a good one. If Canada desires to take her share of the burden of defending her own shores and of uniting with the rest of the motherland's colonies for the purpose of defense, then the question of navy or no navy, of contribution or no contribution, should be separated from party politics. What does this mean? It means that when a great subject becomes a party subject it becomes a prey to that subject, and often whether it is vital to the interests of the country or not it is beaten about at the whim of the party in power. The British navy is now outside party politics. Each party considers it its duty to maintain a sufficient and efficient navy, and that party is looked upon as unworthy of office who would tinker with it. Canada might do worse than follow this lead.

PEACE WITH HONOR

The great strike is over and this week the English miners will again go down into the depths of the earth to delve coal. The poor blind pit horses will once again start their rounds of toll. "It's an ill wind that blows nobody any good," is applicable here. The test horses have had a good rest and will surely be better for it. The men too have rested until many of them got tired of their inactivity and would rather work than loaf around. It is to be hoped that the masters will get up to the living wage idea, and in the conferences that are to follow they will be willing to take smaller profits in order to enable their workmen to live with some small degree of comfort. -There has

been much suffering, almost every class and community has had a share of suffering, and this fact alone should help in getting the workers a great deal of consideration.

AND YET A SURPLUS

The old island is prospering in spite of the great industrial struggle. Lloyd George almost surprised the world the other day when he declared that after everything had been provided for there was a small trifle of about thirty-three million dollars left. It is not always an easy thing for men in high estate who have the duty upon their hands of spending their country's money to please everybody, but Lloyd George seems to have done the right thing when he suggested that the surplus be laid aside to be used as extra for the may if needed. Of course we deplore the necessity of this, but it is well for Germany to see that England is not bankrupt either in regard to men or means. If Germany wills she can begin to put an end to all this enormous expenditure upon armies and navies. Englad does not want to spend this money upon the navy, and she will not if Germany will only moderate her useless naval expenditures.

Consolidated Schools

A meeting for the purpose of discussing the question of Consolidation of Schools was held on Tuesday of last week in the Presbyterian hall. The attendance was not very large, considering the importance of the subject and its bearing upon the welfare of Cayley and the surrounding districts. The time spent, however, was profitable, and a very interesting discussion took up the space of over an hour. There were several districts represented, and it was evident that their desire is that something should be done toward taking fuller advantage of the educational facilities for our children that our country provides. Many of the difficulties in connection with the subject were discussed, among them being the conveying children to school from a distance. Anghier, being the probable opposition toward the proposition that might be encountered if taxation should be increased. It is not probable, however, that taxation would be increased unless a larger new building for the central school is built. However, there are many questions to be considered more fully yet, and it was suggested that the trustees of each school should meet their raters and discuss the question according to its local bearings fully. The Rev. O. E. Mann has promised to lend whatever aid he can to the several districts interested. Will the school secretaries please arrange a time for the discussion of the subject as soon as convenience will permit.

Noxious Alberta Weeds and How to Get Rid of Them

One of the most interesting addresses given at the recent Provincial Seed Fair was that by C. E. Lewis, Superintendent of Fairs and Institutes, and at one time Provincial Weed Inspector, who talked about the weeds of Alberta. The talk was illustrated with pictures of the many weeds that are most troublesome to the farmers and those which the grain grower must be very careful not to allow to get a footing on the farm.

Mr. Lewis treated the question

SORES FROM ELBOWS TO FINGERS

Zam-Buk Worked a Miracle of Healing.

Reverend Gentleman Fully Convalesces

Miss Kate L. Dilliver, of Caledonia, Ontario, has written to me concerning my testimony to the value of Zam-Buk. Ulcers and sores broke out on my arm, and I had been unable to stop them by using various preparations, nothing seemed to do me any good. The sores grew rapidly, and before long there was one mass of ulceration.

I had tried different sores and faithfully carried on their instructions. I drank pint after pint of blood which did no good, and took a lotion after lotion; but it was of no avail.

My father then took me nine miles to see a well-known doctor. He photographed the arm and hand, and sent the pictures to the specialist; but the specialist said they could do nothing further than what I was doing.

"One day a friend asked me if I had tried Zam-Buk. I said 'No.' He then got a box right away, and the first box did me more good than all the medicine I had ever taken. I have since so continued the treatment. Every box healed the sores more and more until at last I am now well again. Zam-Buk healed all the sores completely. Everybody in this place knows my case and is very much interested."

One day a friend asked me if I had tried Zam-Buk. I said 'No.' He then got a box right away, and the first box did me more good than all the medicine I had ever taken. I have since so continued the treatment. Every box healed the sores more and more until at last I am now well again. Zam-Buk healed all the sores completely. Everybody in this place knows my case and is very much interested."

With your corroborates.—The Rev. W. B. M. Parker, of Caledonia, Miss Dilliver's minister, writes: "It is certain that Zam-Buk is a miracle. Dr. Dilliver is correct as far as my knowledge goes. I have known her for a year and a half, and she is a woman by Zam-Buk is remarkable."

Wherever there is ulceration—blood poisoning, gangrene, abscesses, cuts, burns, bruises, or any skin injury or disease, there Zam-Buk will be an answer. It is a true curative. All druggists and stores sell it. At the box price, \$1.00, from the Buck Co. Counter for p.c.s. It relieves cheap and harmful imitation and substitutes."

"Thank you," said a visitor to a bright little fire-side, "what would you do if I gave you a penny?"

"Wish it was a nickel," was the reply.

Mother's Value This Old-Maiders group who know how suddenly crop may seize their children, and how necessary power to defend them is, always keep at hand to keep at hand a supply of Dr. Thomas' Electric Oil, because experience has taught them that the best preparation to be had for the treatment of this affliction is to have a supply of this oil, a valuable medicine.

Divided Ownership

"I eat some of the new snow off your roof, hoping to arouse compassion."

"Not so," the woman replied unkindly. "We only rent the upper flat."

Miranda Liniment for sale everywhere

Some insects digest their food first and eat it afterward. They are so built as to be able to take only liquid food. They have a sharp, strong acid in their prey and thus gradually dissolve it, sucking in the liquid so formed until nothing remains but the dry skin.

The highest electrical station in North America stands on the summit of Mt. Misti, an extinct volcano in South America. The altitude of this station is 12,000 feet above sea level. The thermometer lives at the station. The thermometer on the top of Misti often falls to 25 degrees below zero.

Hopes

"He—they say men of brains live long. She—Well, hope for the best. You may prove one of the exceptions."

COMPLETE Treatment

For All Kinds of ECZEMA

A few drops of Cuticura Liniment, sold by druggists and dealers everywhere, a liberal amount of Cuticura Soap, and a small quantity of Cuticura Ointment, will put most cases of eczema in remission.

Applicator is "Cutter," kept at room temperature.

W. N. U. No. 588.

S. WHEELER ON DRY-FARMING

How to Raise a \$1,000 Bushel Hard Wheat

For a farm live five miles east of Rosenthal, about three miles from the south branch of the Saskatchewan River, and about twelve miles west from the north branch of that river. The soil is a glacial loam, carrying a heavy crop load, and clay, with a slight mixture of sand. It has a chocolate subsoil, and a depth of two inches of topsoil.

Our rains come first in the spring, and then again in the fall. We usually have a hot spell in July and August, with more showers in these months. There are no hard freezes about the first week in November. The snow fall in winter is about 20 inches, and the snow goes off from April 1 to 25 or 30 days, conditions varying year by year.

Before I outline my system of farming, let me say that I have no idea as to what is necessary to produce a good quality and to increase the yield. I have, however, learned three very important essentials, good seed, a good seed bed and uniformity.

In the spring when the seed drill is set up, the first thing to do is to make a plain simple, but firm, surface for the packer to pack the warm moist earth. This is the secret of our success, these great essentials serving to help those who help themselves. Let me assure you that the man who farms in a haphazard manner, and who does not know the secret, is not likely to succeed.

The third essential necessary to success is to have a good seed bed.

It sounds simple, doesn't it? I follow simple in print, but for farmers who have not been raised in the ways of our own country, I have no idea as to what is necessary to produce a good quality and to increase the yield. I have, however, learned three very important essentials, good seed, a good seed bed and uniformity.

I follow the seeder with the surface packer to pack the warm moist earth. This is the secret of our success, these great essentials serving to help those who help themselves. Let me assure you that the man who farms in a haphazard manner, and who does not know the secret, is not likely to succeed.

BUY COCKSHUTT DRILLS

Call and let us explain our Special Anti-Sagging, Anti-Friction and Accurate Sowing features.

A Label
John M. Hart, of a Chicago law office in a subway of the latest office building, in a suit of the latest style, as soon as possible, had a six inches deep, I have a trench behind the plow, so that it is plowed and rolled at one operation, and the soil is turned over to the packer follows next. It works better here than on the breaking. This leaves the soil loose, and it is safe to leave it thus for a few days to allow weeds to germinate. When the soil is in a state of six inches high, harrow with a uniform seed bed, resulting in a uniform seed bed, and producing a uniform seed bed and uniformity.

In the spring when the seed drill is set up, the first thing to do is to make a plain simple, but firm, surface for the packer to pack the warm moist earth. World Could Not Live on Vegetables

The great obstacle to the general welfare of a vegetable diet is its physiological, ethical or philosophical.

It is economic. We cannot all afford to buy vegetables enough in the world for us to eat; and moreover, the surface of the earth and modes of culture, could not produce enough to feed us all. It could not support us under existing conditions now seen far from realization.

The consideration of advanced agriculture, vegetable gardens by Prof. Alonso J. Taylor, of the University of Illinois, in the December issue of the Agricultural Science Monthly, New York (December), states that a vegetable diet may physically fill all the requirements of the body, but that we should not move to adopt the present methods of agriculture.

It is not that we have not the ability to cultivate the surface of the earth for all the needs of the world's population, but with the present methods of agriculture we could not meet the requirements of the world's population.

These plants actually make new, rich blood, which brings health and strength to the body. It is the blood that makes us strong, not only in Canada, but all over the world. Millions and thousands of people are not only in Canada, but all over the world.

The following is a bit of good news. These plants are good for the heart, and will help to keep the heart in good condition.

These plants are good for the lungs, and will help to keep the lungs in good condition.

These plants are good for the kidneys, and will help to keep the kidneys in good condition.

These plants are good for the liver, and will help to keep the liver in good condition.

These plants are good for the brain, and will help to keep the brain in good condition.

These plants are good for the eyes, and will help to keep the eyes in good condition.

These plants are good for the skin, and will help to keep the skin in good condition.

These plants are good for the bones, and will help to keep the bones in good condition.

These plants are good for the muscles, and will help to keep the muscles in good condition.

These plants are good for the nerves, and will help to keep the nerves in good condition.

These plants are good for the glands, and will help to keep the glands in good condition.

These plants are good for the heart, and will help to keep the heart in good condition.

These plants are good for the lungs, and will help to keep the lungs in good condition.

These plants are good for the kidneys, and will help to keep the kidneys in good condition.

THE HUSTLER, CAYLEY, ALBERTA.

BANK OF HAMILTON

**Capital Paid Up..... \$ 2,475,000
Reserves and Undivided Profits..... 1,500,000
Total Assets..... 44,000,000**

IT is not your earning power that will measure your happiness in the later years. Your saving power alone can assure you against the time when your earning power will be reduced.

A savings account at the Bank of Hamilton would be a help toward avoiding the habit of saving. The same courteous efficient attention is given to all depositors whether the account be large or small.

Cayley Branch, JAMES LYALL, Agent

These Fine Warm Days

Are putting new life into all kinds of industry. Farmers are preparing for seeding. Mechanics are at work erecting houses and barns. With it all comes a demand for HARDWARE. We are prepared for all requirements with a complete line of

Rates, \$1.50 per day

With the spring's bright prospects the farmers are more hopeful in this district. Weather conditions have greatly improved the look of things. True, spring work is somewhat behind of some former years, but on the whole things are looking very hopeful.

Our merchants report business decidedly better during the past week or two. One merchant informs us that last Saturday business was the best singe last Christmas. The farmers are getting the returns from their last year's crop, since more care has been supplied.

There will be a grand debate at the bible class on Thursday evening next. "Resolved, which is of the best interest to the country—wood or iron—which could we do without the best?" This will be the closing debate of the season. In addition refreshments will be served, and a general social evening will be had.

Station Agent Allan and family left this week for their new home near Medicine Hat, where they take up a half section of scrip land. We are sorry to lose them from Cayley, where they will be greatly missed both in the church and social life of the village. Billy's familiar figure will be missed considerably at the ticket window. We wish them every success in their new sphere of labor and every happiness in their home life. They will always receive a hearty welcome whenever they pay Cayley a return visit.

The Methodist church held its anniversary services on Sunday. The morning and evening services were attended by large congregations. The special preacher for the day was the Rev. E. Scragg of Juniperfield, an impressive speaker whose presence will always be accorded a warm welcome whenever he visits Bowden again. Both in the morning and evening appropriate music was rendered by the church orchestra, and solo songs were sung by Mrs. Scragg, a charming light soprano, Mrs. David and Mr. Hunter. Miss Sheindorf capably officiated at the organ.—Bowden correspondent to Calgry Herald.

Indications are that the farmers of this section will reap one of the greatest crops ever in this district. This week general seedling operations were started and are being continued. It is estimated by one in a position to know that the acreage under the plow will be greatly increased. Many of those who until this year devoted their land to the raising of grain entirely have branched out into diversified farming, consequently the crop this year will not only include grain but general produce to a great extent.

On Sunday evening next, at the Methodist church, Cayley, Mr. Barnes will speak upon, "How the Bible," and Rev. O. E. Mann will speak upon, "The Bible, compared with other books."

Did it ever occur to you that you should your share towards boosting the district in which you live? When yes, write to your friends tell them about the district. You may be the means of adding a new settler.

The village council, at their last meeting, decided to purchase lot 20, block 3, east of the Presbyterian hall, a site for the new fire hall, etc., excavation for which will be begun as soon as the frost is sufficiently out of the ground.

Garfield Nelson was found dead last Friday morning about 20 miles east of Vulcan. Nelson had apparently driven his team to water and received a stroke of heart failure for it was found leaning over the dashboard of his wagon, with his hat in the water, and his horses knee-deep in the water.

While the farmers are firing their stubble it is well to remember to see that they have a good fire guard around their property. Last week C. Gardner's stubble fire got away from him and got into the danger zone of Mr. Eaglesham's property.

Misses Scragg and Cais of Nanton were the guests of Mr. and Mrs. Fred H. Scragg for Easter.

One of Cayley's football team promised to send us a full report of the great game at High River on Monday, but up to going to press has failed to make connection.

We regret to learn the death of the nine month old child of Mr. and Mrs. J. W. Vance of Cayley which sad event occurred on Tuesday last, at 5 p.m. The bereaved parents have the heart-felt sympathy of their many friends in their sudden and sad bereavement.

NOXIOUS WEEDS

(Continued from Page 1)

no less than 1,500,000 of its kind in one season. If one plant of this weed appears in a field, he advised the farmers to get after it and root it out. Then mark the spot and visit it every two or three weeks and pull it up again if it reappears.

If they are very bad he would advise harrowing with a light harrow even after the crop of wheat or whatever it might be, is up.

For this a light harrow should be used with the teeth tilted back. This will pull a great many of the weeds out and injure the crop.

Summer fallowing should also be indulged in, but the plowing should always be done before the weeds come to the pod state. It is done after that, it is only aggravating the condition.

If the farm is badly infested with wild oats, Mr. Lewis would recommend the sowing of a bushel of domestic oats to the acre allowing the cattle to pasture on it. This will keep the wild variety cropped down and eventually eliminate it.

The worst features of wild mustard is the fact that it takes up such a great deal of the moisture from the growing crops, and also the fact that its seed possesses such a wonderful vitality. It has been known to lie in the ground for forty years and then when the land is turned up, to spring up and thrive.

To eliminate tumbling mustard the best method is to disc or spud them out. Do not sow a crop on a field which is infested with this weed, as you will get nothing anyway, and it is only time wasted. To go through the field and spud them out or to summer fallow the land in time will spent.

He would also recommend that as soon as the threshing is done that the weed seeds be all burnt or buried very deep so as to eliminate the chances of them growing and infesting the land.

Among the many weeds named by Mr. Lewis mentioned, worn seed mustard, shepherd's purse, false flax, green tansey mustard, stink weed, blue lettuce, prairie thistle, Canada thistle, pig weed, cow cockle, Russian thistle, wild oats, Russian pigweed, ragweed.

Tenders Wanted

For putting in a mile of Page Ranch. Tenders to be in by April 20th. For full particulars apply to DR. BROWN, Village Clerk.

SEED OATS FOR SALE

Abundance Seed Oats for sale, tested high germination, pure and clean, 35¢ at bin. Also Preston Wheat at 75¢ bushel. Five miles east of Cayley W. R. PHILLIPS — Box 55, Cayley

OATS FOR SALE

1000 bushels of Silver Mine Oats for sale at 35¢ per bushel. Tested 95 per cent. at Calgary in four bushels. E. C. SHORT, N.E. 1/4 14-17-29 1 mile west of Cayley.

A "Friday" ship, a special Hutchinson captain who way back in the early years of the republic, determined to exhibit the fallacy of the Friday superstition. He sailed on Friday, the 13th, for building of ships, and it was arranged that the rest of this vessel would sail on Friday, that was not named for the day. Friday, commenced loading on a Friday and hauled into the stream on the same day of the week. To add to the misfortune, the name of the vessel was named Friday was engaged, and, thus fully freighted with the sinister name, she sailed on Friday, the 13th, to a port in the West Indies. From that day to this no tidings of the ill-fated craft have been received.

FEAST OF FOOLS.
The best authorities agree that the origin of the ancient custom of celebrating a feast of fools is unknown. Some identify it with the Roman feast of Fools on March 1. Others believe that the feast of fools is Indie March 31 is the "hull festival," when all manner of pranks are played upon the people. What is the origin of the hull? Did the Hindus get it? The French call the April Fool "un poisson d'avril" (April fish). To the Scotch he is a "gauze" (a crooked).

Smarter.
Smarter—They are going to be married? Why, I didn't know they were engaged. Smarter—Well, you see, there are so many engagements now, now that the girls think they wouldn't get engaged just simply married.

Smarter.
Dr. Hambrick once asked Schumann how far he got on with Wagner.
"Not at all," replied Schumann, "for me Wagner is impossible. Doubtless he is a very good man, but Wagner, one foot—one cannot get a word in."

Some time after, in an interview with Schumann, he said to Wagner, "What are you doing now?"

"With Schumann," said Wagner, "I am learning to arrive at an understanding. He is a good man. Some years ago on my return from Paris I called upon him to talk of opera, and he told me that he had written an interesting memoir with which I had become acquainted. Schumann looked at me steadily, but neither he looked into space, nor I. Finally, he said, "Faith, I lost leave of him almost immediately. He is an impossible man."
